INTEGRATED PICTURE HANGING SYSTEMS

Artiteq has developed a series of integrated picture hanging systems, which can be integrated in combination with recessed ceilings or plasterboard ceilings during new-build or renovations. The rail is integrated while the ceilings are being installed. These systems offer huge advantages to end users, with a hanging system becoming available throughout the entire space.

By selecting integrated hanging systems you set the standard for perfection. Combining picture hanging systems with recessed ceilings or plasterboard ceilings creates rooms with walls that can be designed flexibly and easily. And also for the long term, without damage to walls and without additional costs. This also results in considerable steps towards sustainable building management and cost savings.

- custom-made solutions
- optimal ease of use
- damage-free walls
- easy installation

SHADOWLINE DRYWALL

The **Shadowline Drywall rail** enables the placement of an invisible picture hanging system between plasterboard walls and ceiling panels. A **discreet shadow line** is the only element that appears between the wall and ceiling, and this is where the flexible picture hanging system is hidden. It is possible to install a hanging wire in the rail, anywhere you like in the room. Since the rail itself isn't visible, the hanging cords are suspended directly from the ceiling. Using the Shadowline ceiling system means you will always have a guarantee of smooth, clean walls, and the flexibility to decorate them any way you like, without the need for tools.

SHADOWLINE MASONRY

The **Shadowline Masonry** rail has been specially designed for use with **plasterboard ceilings and masonry walls**. The Shadowline rail is installed on a masonry wall during the building or renovation phase. The Shadowline profile disappears completely in the shadow line next to the ceiling panels, yet still offers all the advantages of a flexible hanging system: undamaged, clean walls and the flexibility to quickly and easily hang paintings and other wall decorations and move them around as desired.

DECO RAIL

The **Deco Rail** is a hanging rail for pictures and wall decorations that is **mounted behind a cornice**. The hanging rail system becomes invisible as a result, while still offering all the advantages of a flexible hanging system. Walls with a clean, smooth finish remain undamaged, even though it is still possible to hang and move paintings continually. Hanging wires may be clicked into the rail behind the cornice at any desired location. This is the major benefit of the Deco Rail; flexibility and a guarantee for a high-quality finish. There are many different styles of cornice rails, and this hanging rail can be installed behind every type.

DECO RAIL LED

The **Deco Rail LED** is a hanging system and lighting profile, with **subtle indirect LED lighting** in one. With the lighting profile C362 by ORAC, you add indirect lighting by diffusing light from the wall. A modern, ambient finish within the interior. Combining the Deco Rail with the lighting profile results in an invisible hanging system and allows flexible adornment of the walls. With no damage to sleekly finished walls, pictures can be hung and moved around whenever you please. Hanging wires can be clicked anywhere along the rail behind the lighting profile. The indirect profile is supplied without the LED.
