HOLES? YOUR WALL DESERVES BETTER!

Artiteq®

A gap in the market instead of a hole in your wall or a dent in your budget!

The evolution of picture hanging systems

What originally started as a practical solution for displaying works of art in museums in a flexible manner has, over the past few decades, evolved into a versatile hanging system. Today, these systems are indispensable in both residential and commercial buildings. As part of this evolution, Artiteq, with over 30 years of experience, has become the leading specialist in hanging systems. Thanks to in-depth knowledge, Artiteq is a reliable partner for museums, homes, offices, schools and institutions.

The Artiteq hanging systems combine museum-quality standards, with the convenience and flexibility that individuals and businesses value. With one-off mounting, a flexible wall solution can be created, without worrying about drilling holes or damage to walls or surfaces.

Whether you wish to hang pictures, photos or other decorations, Artiteq's systems make it easy to continuously change a wall to your taste, interior or for a specific occasion. What once began in prestigious galleries has now become an essential solution for anyone looking to make the most of their walls.

Artiteq brings creativity, style and functionality to every wall – from museums to living rooms

FLEXIBLE WALL SOLUTIONS FOR MODERN HOMES

For many years, consumers have bought Artiteq products from renowned hardware stores and install these hanging systems in their homes. Traditional drilling into walls in order to hang pictures is now a thing of the past. With one-time installation of an Artiteq picture hanging system, a flexible wall solution is created, allowing picture frames and other wall decorations to be easily hung, moved or replaced without causing permanent damage to the walls.

Artiteq's systems offer convenience, flexibility and a sustainable solution for every wall.

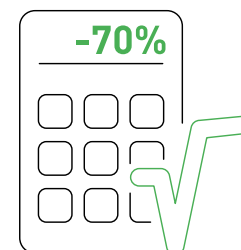

SMART, SUSTAINABLE AND UP TO A 70% SAVING IN MAINTENANCE COSTS

Why keep spending money on regular plastering and repairing drilling holes when a flexible hanging system provides the perfect solution? Artiteq enables you to transform valuable walls, whether they are made of wood, concrete or plasterboard, into versatile, durable and maintenance-free solutions. All with a saving of **70% on maintenance costs!**

A calculation that matters:

it would typically cost € 200 to regularly plaster a wall measuring 4 metres wide by 2.5 metres high. Opt for an Artiteq hanging system and you'll pay just € 60.00 once only, including mounting. That's an immediate saving and a smart investment in sustainability.

LOW 'COST OF OWNERSHIP':

A one-off investment, no recurring maintenance costs.

WHY CHOOSE ARTITEQ? FOR CONCRETE WALLS

• No drilling holes:

Concrete walls remain undamaged, ensuring that the finish remains sleek and maintenance-free.

• Suitable for heavy decorations:

Artiteq hanging systems have a high carrying capacity, making them ideal for heavy works of art.

• Professional appearance:

Provides a neat and flexible finish in both residential and commercial spaces.

FOR WOODEN WALLS

• Protects Biowood construction walls:

No damage or additional costs from drilling or repairs.

• Seamless integration:

The rail can be finished with, for example, veneer tape, for a sleek, invisible solution.

ARTITEQ IS THE PERFECT CHOICE FOR MODERN PROPERTY DEVELOPMENTS.

Save time, money and hassle. Choose a hanging system that evolves with the future!

FLEXIBILITY, SUSTAINABILITY AND A CONTEMPORARY SOLUTION FOR EVERY WALL

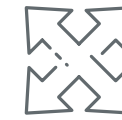

BUILDING FOR THE FUTURE

With the rise of modular construction, a picture hanging system has become essential. Modern walls, often made from sustainable, eco-friendly materials, require a solution that prevents damage and minimises maintenance.

The Artiteq hanging systems can be seamlessly integrated into modular housing types, or used as wall and ceiling mounted hanging systems. Even within traditional constructions, an Artiteq standard hanging system offers significant advantages.

This avoids costs for repair work, such as plastering after drill damage. In addition, the systems contribute to sustainable building management, are recyclable and are perfectly in line with the needs of modern consumers.

The Artiteq hanging systems therefore establish a smart, sustainable and futureproof standard for wall management in both modular and traditional construction projects.

Flexibility and convenience

Pictures and photos can be easily hung and moved around without the need for more drilling or screwing.

Protection of walls

The hanging system eliminates the need to drill holes, protects walls and maintains a neat appearance with every new layout.

Stability and security

A reliable hanging system provides added security, ensuring that works of art remain firmly in place. This significantly reduces the risk of falling or damage.

Suitable for all sizes

Picture hanging systems can be easily adjusted to accommodate various sizes and weights, making them highly versatile.

Aesthetic benefits

Many hanging systems feature a minimalist design, allowing the focus to remain entirely on the artwork without distracting fixtures.

Simple reorganisation

A flexible hanging system allows artwork to be easily swapped or moved around without having to alter the wall again.

- simple installation
- flexible use
- sustainable and versatile

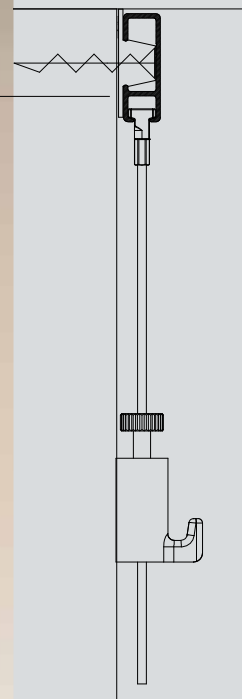

The Artiteq Click Rail is a versatile picture hanging system that is perfectly suited to both traditional property developments and modular construction projects. The system offers flexibility, aesthetic benefits and sustainability, with advantages for both construction professionals and end users.

CLICK RAIL

as a flexible wall solution

Click Rail

In the property and construction industry

The Click Rail gives residents the freedom to easily hang, move or replace pictures and decorations without damaging the walls. This eliminates the need for repeated drilling and plastering, resulting in lower maintenance costs and gives walls a longer lifespan.

In the modular construction sector

In modular construction projects, the Click Rail offers an efficient solution that can be pre-installed. The rail can be mounted flush against the ceiling and, if preferred, can be painted to match the wall or ceiling colour, making this almost invisible.

MAIN ADVANTAGES:

- **positive living experience:** lots of variation and added ambience.
- **Aesthetic integration:** mounts flush against walls and ceilings.
- **Cost savings:** avoid repair costs resulting from drilling or plastering.
- **Sustainable:** made from recyclable materials.
- **Rapid installation:** can be mounted efficiently with the Click & Connect system.
- **High carrying capacity:** can carry up to 30 kg per metre, which ensures reliability.

With the Click Rail, Artiteq offers a sustainable, efficient and flexible wall solution that contributes to future-proof construction.

UP RAIL

a reliable ceiling solution

The Artiteq Up Rail is a versatile and solid ceiling hanging system, ideal for both traditional property developments and modular construction projects. Thanks to its discrete appearance and reliable carrying capacity, the Up Rail offers flexibility and ease of use for both construction professionals and end users.

In the property and construction industry

The Up Rail is an excellent choice when wall mounting is undesirable or not possible. This system is securely attached to the ceiling with clips, ensuring a carrying capacity of 20 kg per metre. The rounded shape of the rail elegantly fills the space between the wall and ceiling, providing a neat and subtle finish. In addition, the rail can be painted in any preferred colour to ensure it blends in perfectly with the interior.

In the modular construction sector

In modular construction projects, where flexibility and efficiency are crucial, the Up Rail offers a practical solution for ceiling mounting. The system enables decorations,

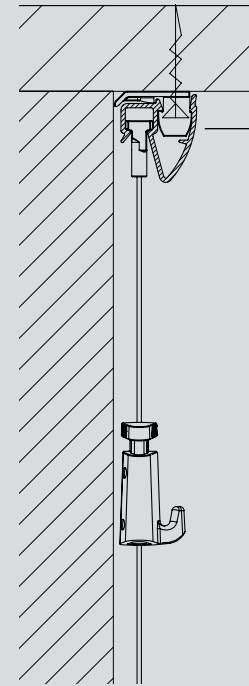

artwork and other items to easily hang on the wall, without causing damage. The rail can be pre-installed, which saves time and money during the construction phase.

MAIN ADVANTAGES:

- **Ceiling mounting:** ideal when wall mounting is undesirable or impossible.
- **High carrying capacity:** can carry up to 20 kg per metre, which ensures reliability and security.
- **Unobtrusive design:** the rounded shape fits seamlessly against the wall and ceiling.
- **Aesthetically pleasing finish:** available in white primer; can be repainted in any colour desired.
- **Flexible use:** the Twister hanging wires can be positioned anywhere along the rail.

With the Up Rail, Artiteq offers a solid, aesthetically pleasing and flexible ceiling solution that perfectly meets the dynamic demands of traditional property developments and modular construction projects.

- flexible ceiling solution

NO MORE DAMAGE TO THESE EXPENSIVE BIOWOOD/WOODEN CONSTRUCTION WALLS

- seamless installation
- high carrying capacity
- veneer finish

MODULAR RAIL

flexibility for modular construction

The Artiteq Modular Rail is specifically designed for integration into modular and prefab walls. This customised hanging system offers all the flexibility and versatility of the Artiteq rails that you are accustomed to from us, with specific modifications for modular construction processes. With a carrying capacity of 20 kg per meter, the rail provides a solid and reliable solution for hanging pictures, decorations and functional elements.

Seamless integration in prefab walls

The Modular Rail is screwed directly into wooden prefab walls. This ensures maximum stability and efficient installation. In wooden walls, the rail can be finished with a veneer tape in the same 'look & feel' as the wall, making the system blend seamlessly into the interior and become almost invisible.

Flexibility and functionality

Despite its seamless integration, the Modular Rail retains full flexibility. Decorations, artwork and functional items can easily be hung, moved around or replaced, without any

damage to the walls. This creates a dynamic and sustainable wall solution that perfectly meets the diverse needs of modular construction projects.

MAIN ADVANTAGES:

- **Invisible rail:** direct mounting on prefab walls, with no visible fixings.
- **High carrying capacity:** reliable support, up to 20 kg per metre.
- **Veneer finish:** in wooden walls finished with a veneer tape for invisible integration.
- **Flexible use:** effortlessly move and adjust decorations without damaging the walls.
- **Sustainable and future-proof:** made from sustainable materials for long-term use.

With the Modular Rail, Artiteq offers a customised, flexible and sustainable solution that seamlessly aligns with the modern needs of modular construction projects.

INVISIBLE HANGING SOLUTION FOR DRYWALL WALLS AND CEILINGS

SHADOWLINE DRYWALL

hanging solution for drywall walls

The Artiteq Shadowline Drywall offers an invisible hanging solution for drywall walls and ceilings. The rail is seamlessly integrated between the wall and ceiling panels during installation, leaving just a faint shadowline as a visible distinction.

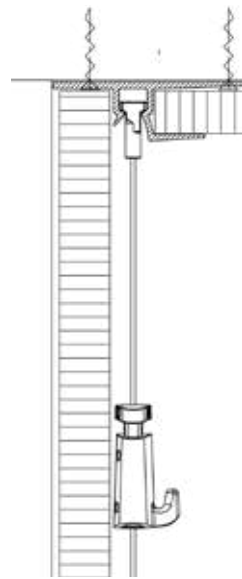

Hanging wires can easily be positioned anywhere you wish on the rail, without tools being required. This means the system is ideal for a streamlined, minimalist finish with maximum flexibility.

MAIN ADVANTAGES:

- **Invisible integration:** only a faint shadowline is visible.
- **Flexible use:** hanging wires can easily be positioned and moved.
- **Flush finish:** maintain uninterrupted walls and ceiling.
- **Sustainable and damage-free:** no drilling holes or wall damage.

With the Shadowline Drywall, Artiteq offers a stylish and flexible solution for modern residential and modular construction projects.

Shadowline Drywall

SHADOWLINE MASONRY

Invisible hanging solution for brick walls

The Artiteq Shadowline Masonry has been specifically designed for use on brick walls in combination with drywall ceilings. This invisible hanging system seamlessly blends into the shadowline next to the ceiling, while maintaining the flexibility to easily hang and move pictures and decorations.

Seamlessly integrated

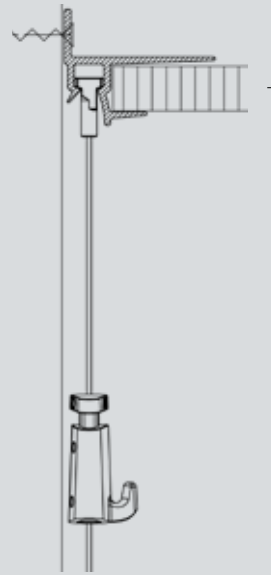

The rail is attached directly to the brick wall during construction or renovation. The faint shadowline ensures that the wall remains smooth and uninterrupted, while hanging wires can be positioned anywhere along the rail, without tools or visible attachments being required.

MAIN ADVANTAGES:

- **Invisible integration:** flush finish due to hidden installation.
- **Flexible use:** hanging wires can easily be moved.
- **Sustainable and damage-free:** no drilling holes or damage to walls.
- **Can be used in modern construction projects:** suitable for both new build and renovation.

With the Shadowline Masonry, Artiteq offers a sustainable, flexible and invisible hanging solution for modern residential and modular construction projects.

Shadowline Masonry

INFO RAIL

indispensable hanging system

The Artiteq Info Rail is the ideal display system for displaying cards, posters, drawings and photos on the wall. The rubber clamping keeps documents firmly in place, without damaging the wall with thumbtacks or tape. Documents can be changed easily and quickly, making the system ideal for dynamic environments.

MAIN ADVANTAGES:

- **Flexible use:** drawings, cards and photos can easily be positioned and changed.
- **Sustainable and damage-free:** no drilling holes or wall damage.
- **Versatility:** can be expanded for a more dynamic display.

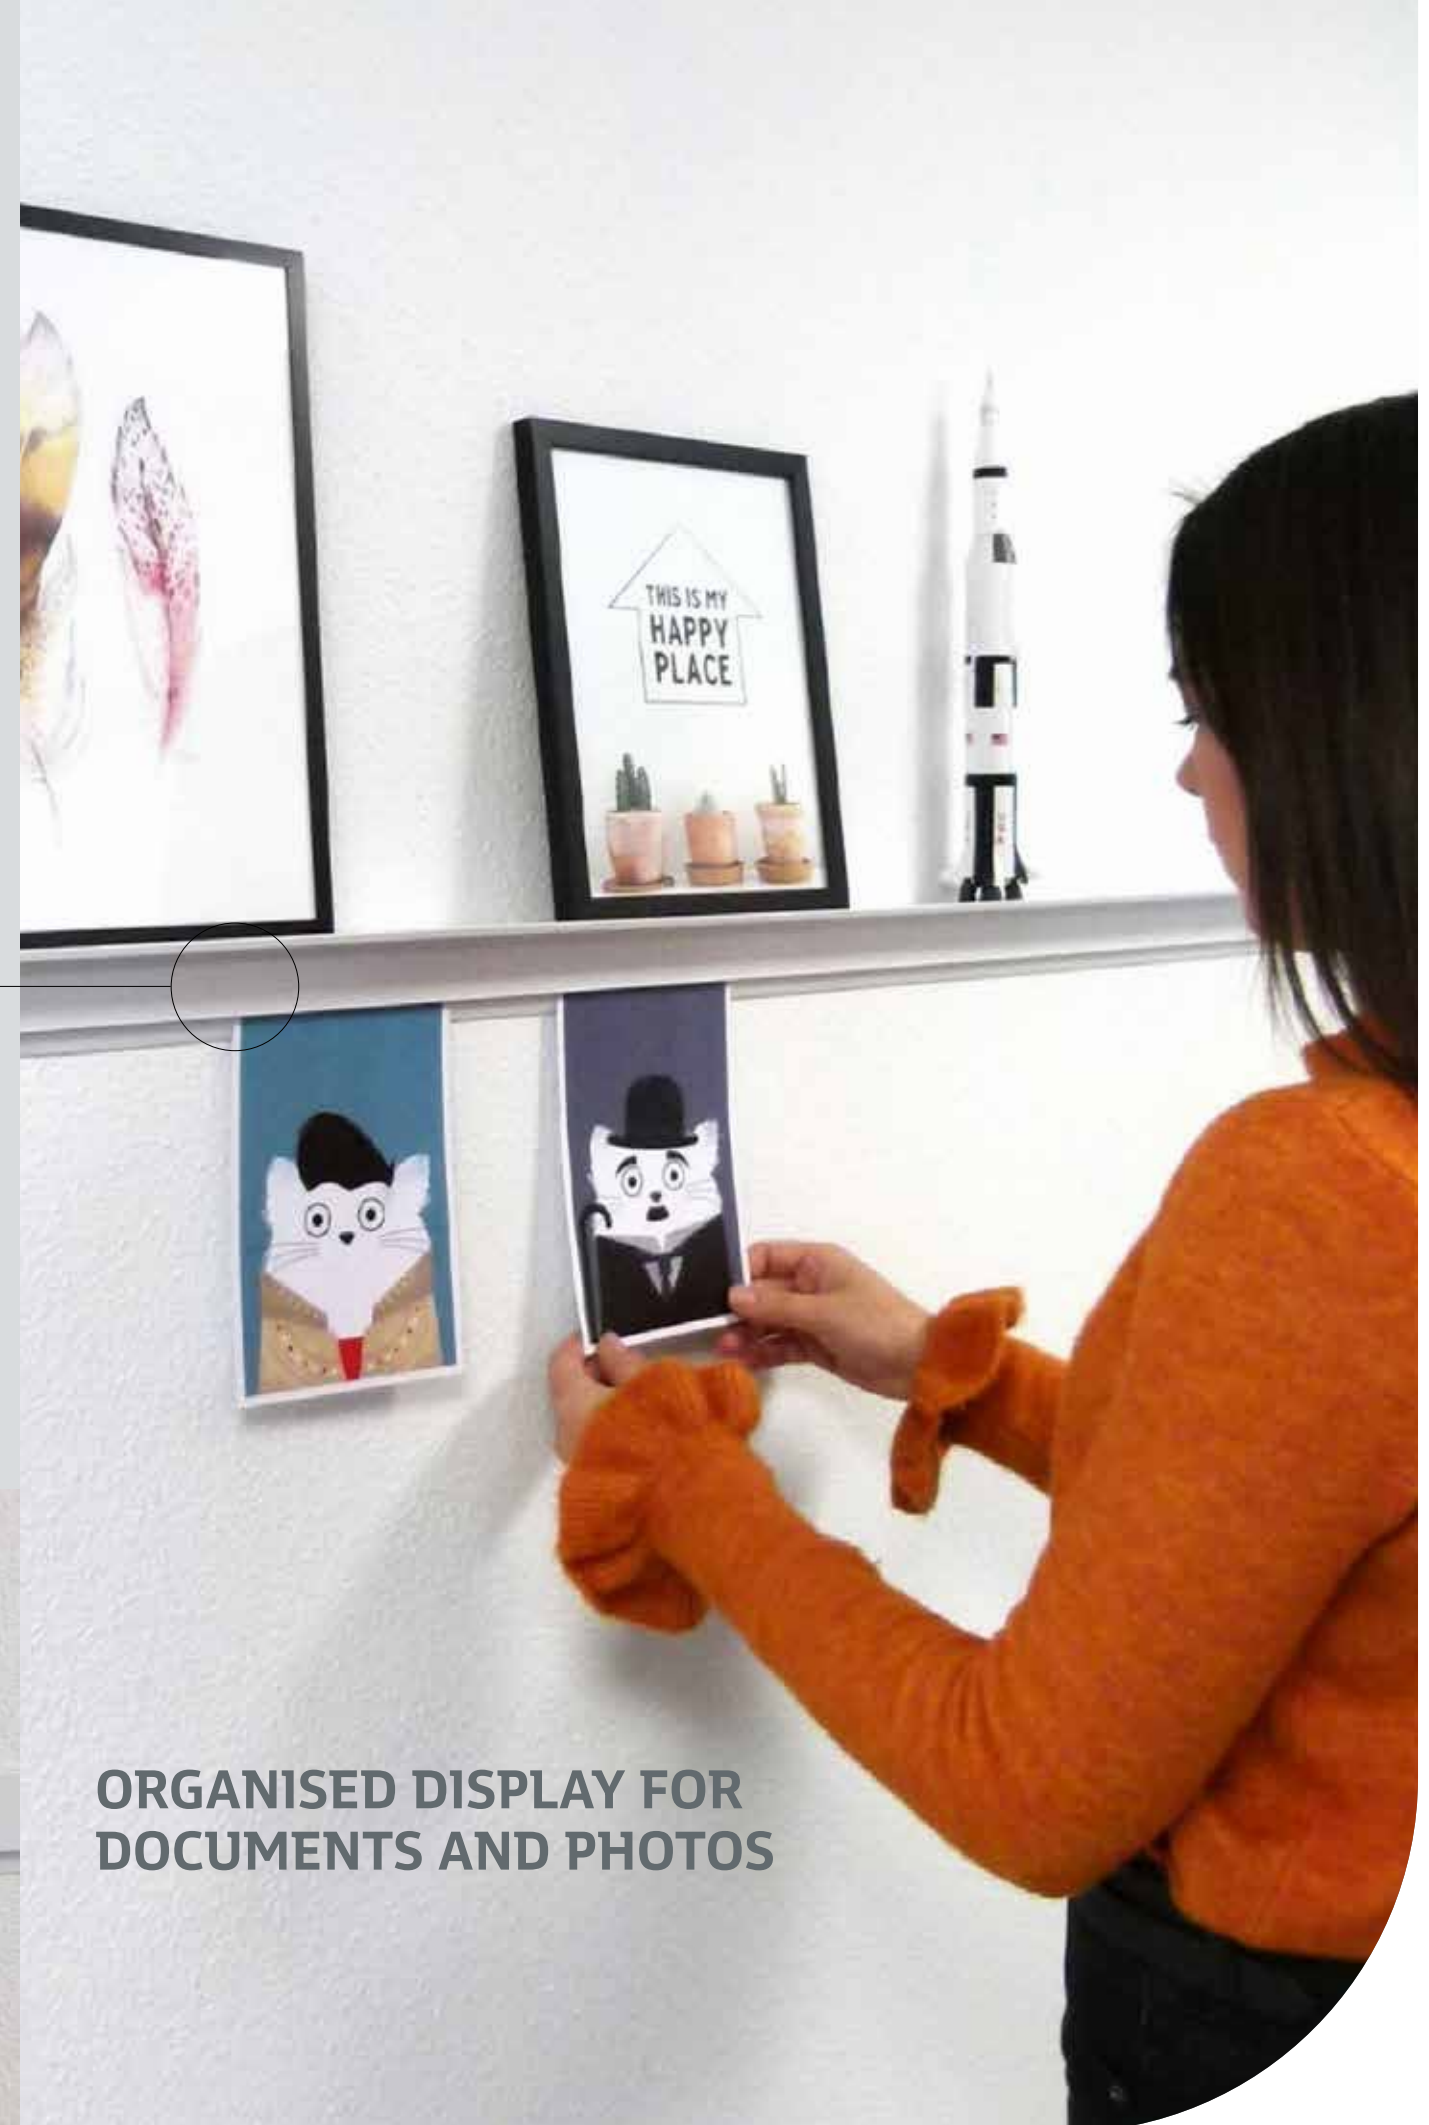

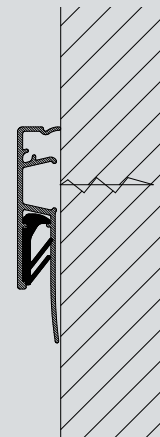

Useful accessories for additional functionality

- **Support Clip:** ideal for displaying small craft projects, cards or canvases.
- **Storage Clip:** practical storage tray for pens, markers and other small objects.

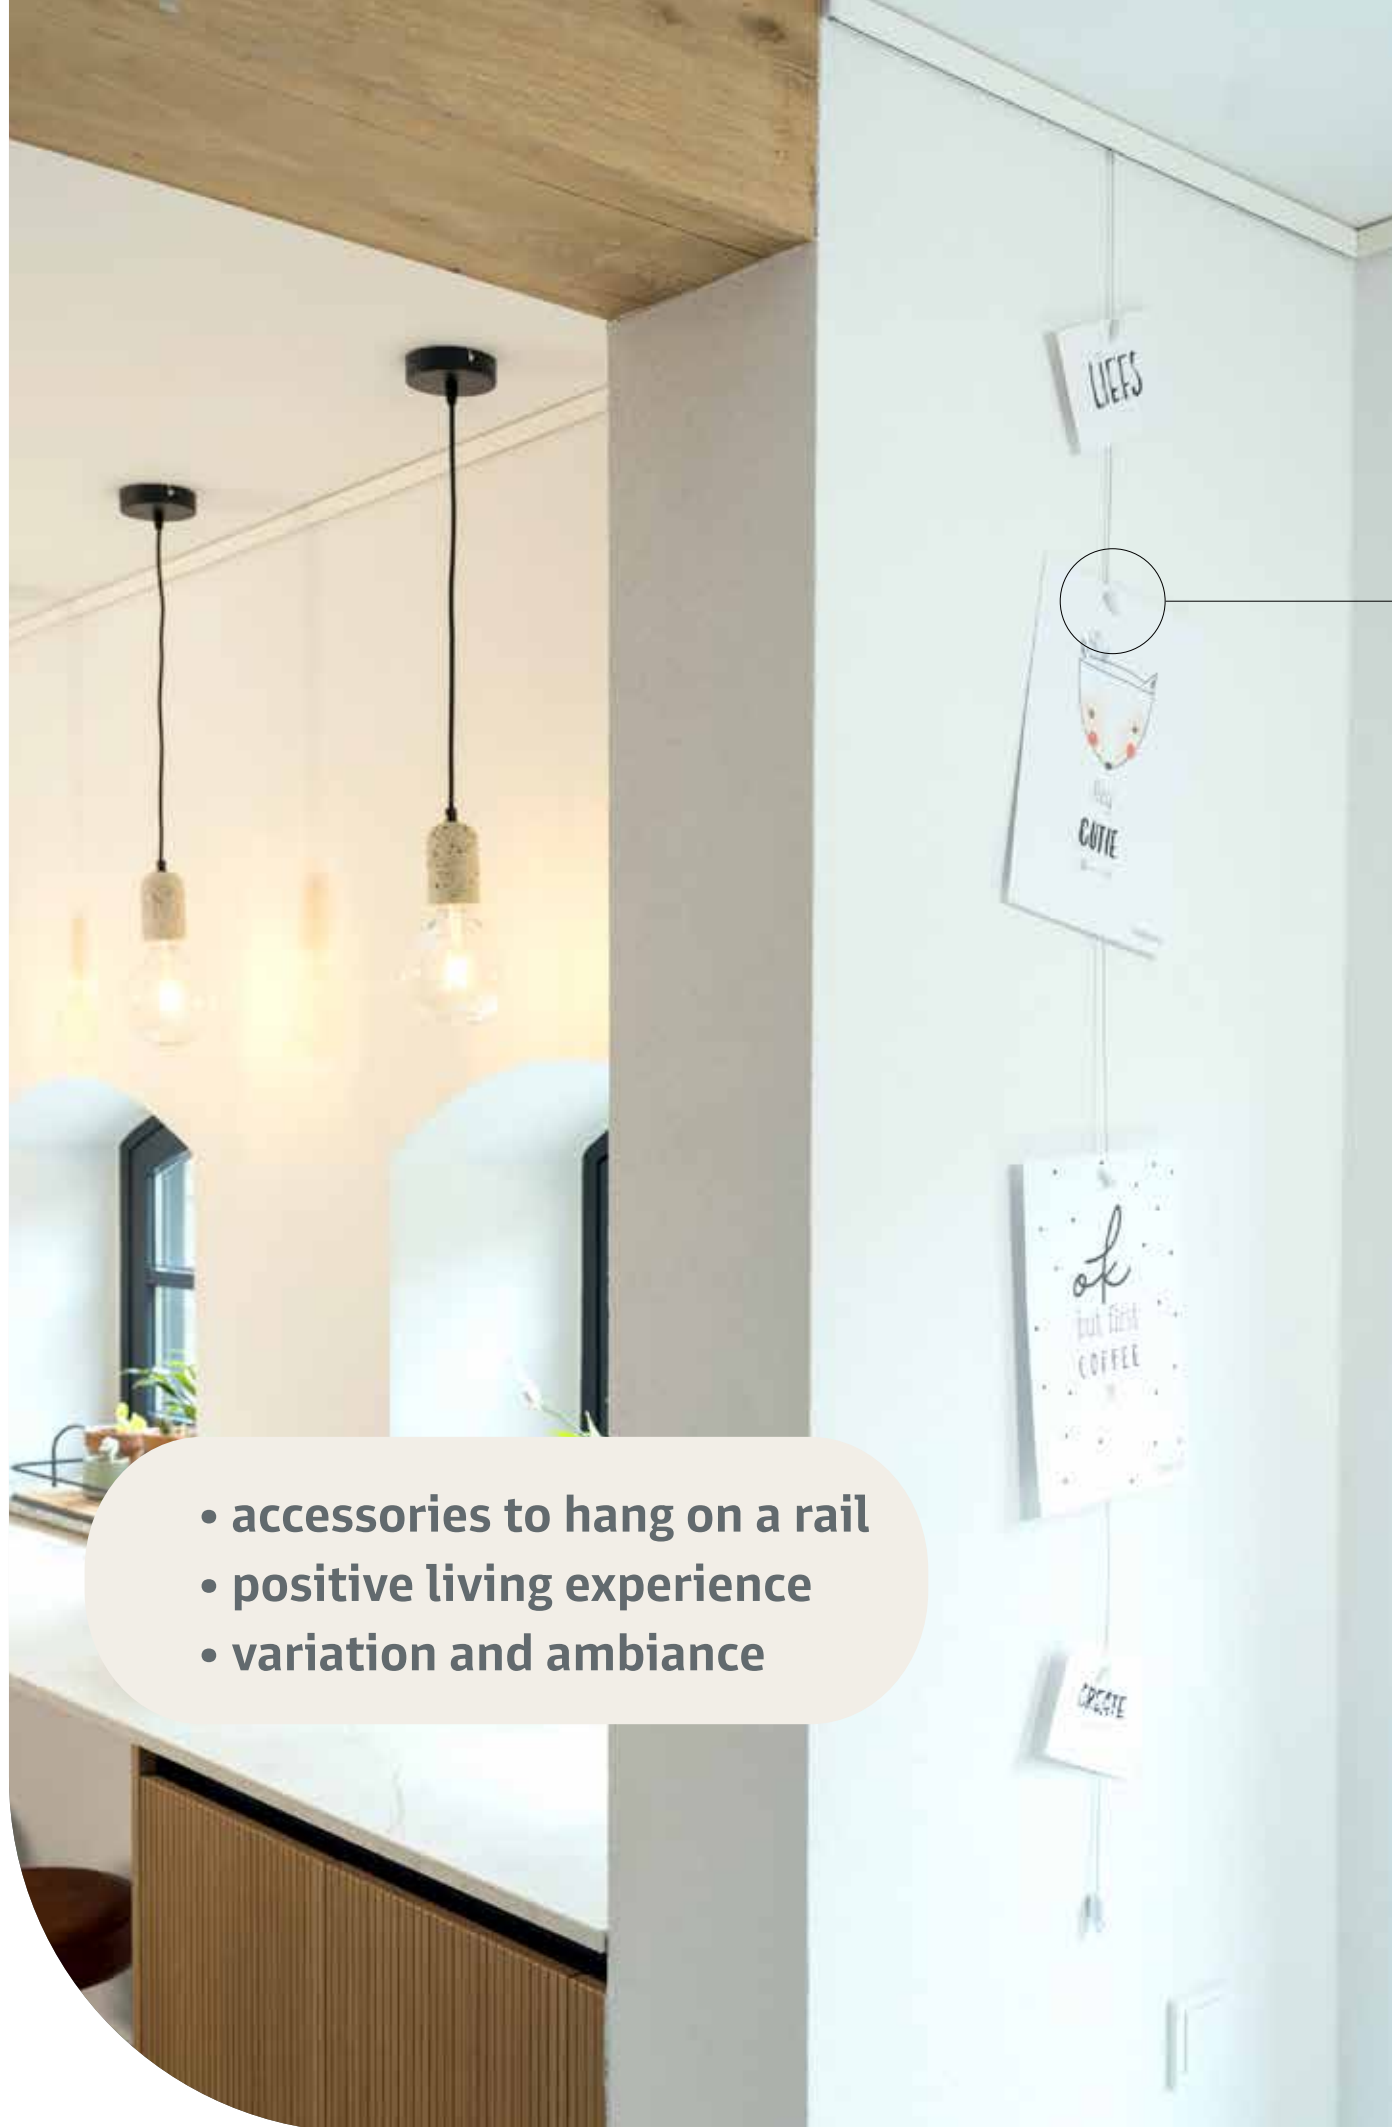

Both accessories can be effortlessly attached to the rail at any desired spot and are available in black and white, for a sleek, stylish finish.

With the Info Rail, Artiteq offers a flexible and tidy display solution for every room.

PICTURE MOUSE & LOOP MAKER

flexible display of photos and decorations

The Artiteq Picture Mouse and Loop Maker offer flexible solutions for displaying and hanging photos, cards, documents and objects. Both systems combine ease of use with a sleek design and are perfectly suited to both traditional property developments and modular construction projects.

- **Picture Mouse:** a handy hanging cord for displaying cards, photos and documents. Available as part of a picture hanging system or as an independent solution (Picture Mouse Solo) by simply mounting the wall clip to the wall.
- **Loop Maker:** ideal for objects that cannot be hung with a hook. A loop with the 2-mm Perlon hanging wire allows decorations and other items to be attached safely and flexibly.

Both systems offer optimal flexibility and prevent damage to walls when altering or replacing decorations.

With the Picture Mouse and Loop Maker, Artiteq offers versatile and smart hanging solutions for every room.
