

FLEX SCREEN HANGING SET

 **40** kg

10
YEAR
WARRANTY

With the Flex Screen Hanging Set, you can transform any TV or monitor into a sleek and stylish wall display. No fixed wall brackets, no drilling holes, just a flexible and re-positionable TV mounting solution that allows your screen to blend seamlessly into your interior. Perfect for spaces where layouts change frequently, such as offices, schools, and modern living rooms. The set includes a universal metal frame compatible with standard VESA mounting patterns, suitable for various screen sizes.

The height-adjustable steel cables with an auto-grip mechanism let you position the screen precisely at the desired height. These cables can be mounted directly into an existing Artiteq picture rail system, making the screen horizontally adjustable without tools or wall damage. Integrated leveling feet make it easy to fine-tune the tilt and alignment of the screen for a perfectly straight setup.
